

Emerging Technologies Pilot Program

Prequalification Questionnaire

PJM Interconnection, L.L.C.

I. Introduction

This questionnaire is used to collect initial information from companies or research organizations wishing to engage in an emerging technology or advanced research pilot project with PJM. The information gathered in this form will be used by PJM Staff to initially screen the project proposal. We ask that you respond fully to each question and provide any supporting documentation you feel may be necessary for evaluation.

After receiving your response to this questionnaire, PJM Staff will conduct an evaluation and provide you our findings within 5 business days.

II. Identification:

- Company's name, address and website:

- Brief introduction of your company (history, core business, etc.)

III. General Questions:

- Where do you hear about PJM's pilot program?

- What is the main purpose of the proposed pilot project?

- Is your company (or your parent company) currently a PJM member? If not, do you intend to become a PJM member before or after the pilot project? Do you providing technical solution(s) to PJM member companies or organizations? If neither fits your case, please explain.

- To what extent are you familiar with PJM or the PJM marketplace?

- The three core business functions of PJM are reliable grid operations, fair and efficient wholesale electricity markets, and regional transmission planning. To which of these three areas is this project most closely aligned?

- What is your expected date to start and end the project?

IV. Technical Questions (if wishing to pilot a specific technology):

- Please provide a brief introduction on the technology that will be used in your pilot project and explain its innovativeness.

- Has the technology used in this potential pilot been commercialized anywhere? It would be helpful if there is a case study to share, but it is not required for initial screening.

- If your pilot project involves energy/capacity resources, please provide a brief introduction of the resource type and the geographical location (including utility territory) of the resources. If possible, please provide a resource profile.

- Please identify technical support, training, or data resources that you may need from PJM to proceed with this project.
